How the magical vDotPay works

Machines accept digital payments and act

vDotPay, the revolutionary device that accepts digital payments and make things act.
Here is an example of use in which vDotPay is easily installed inside the washing machine.

User downloads an app, creates an account and makes the payment to the laundry service provider.

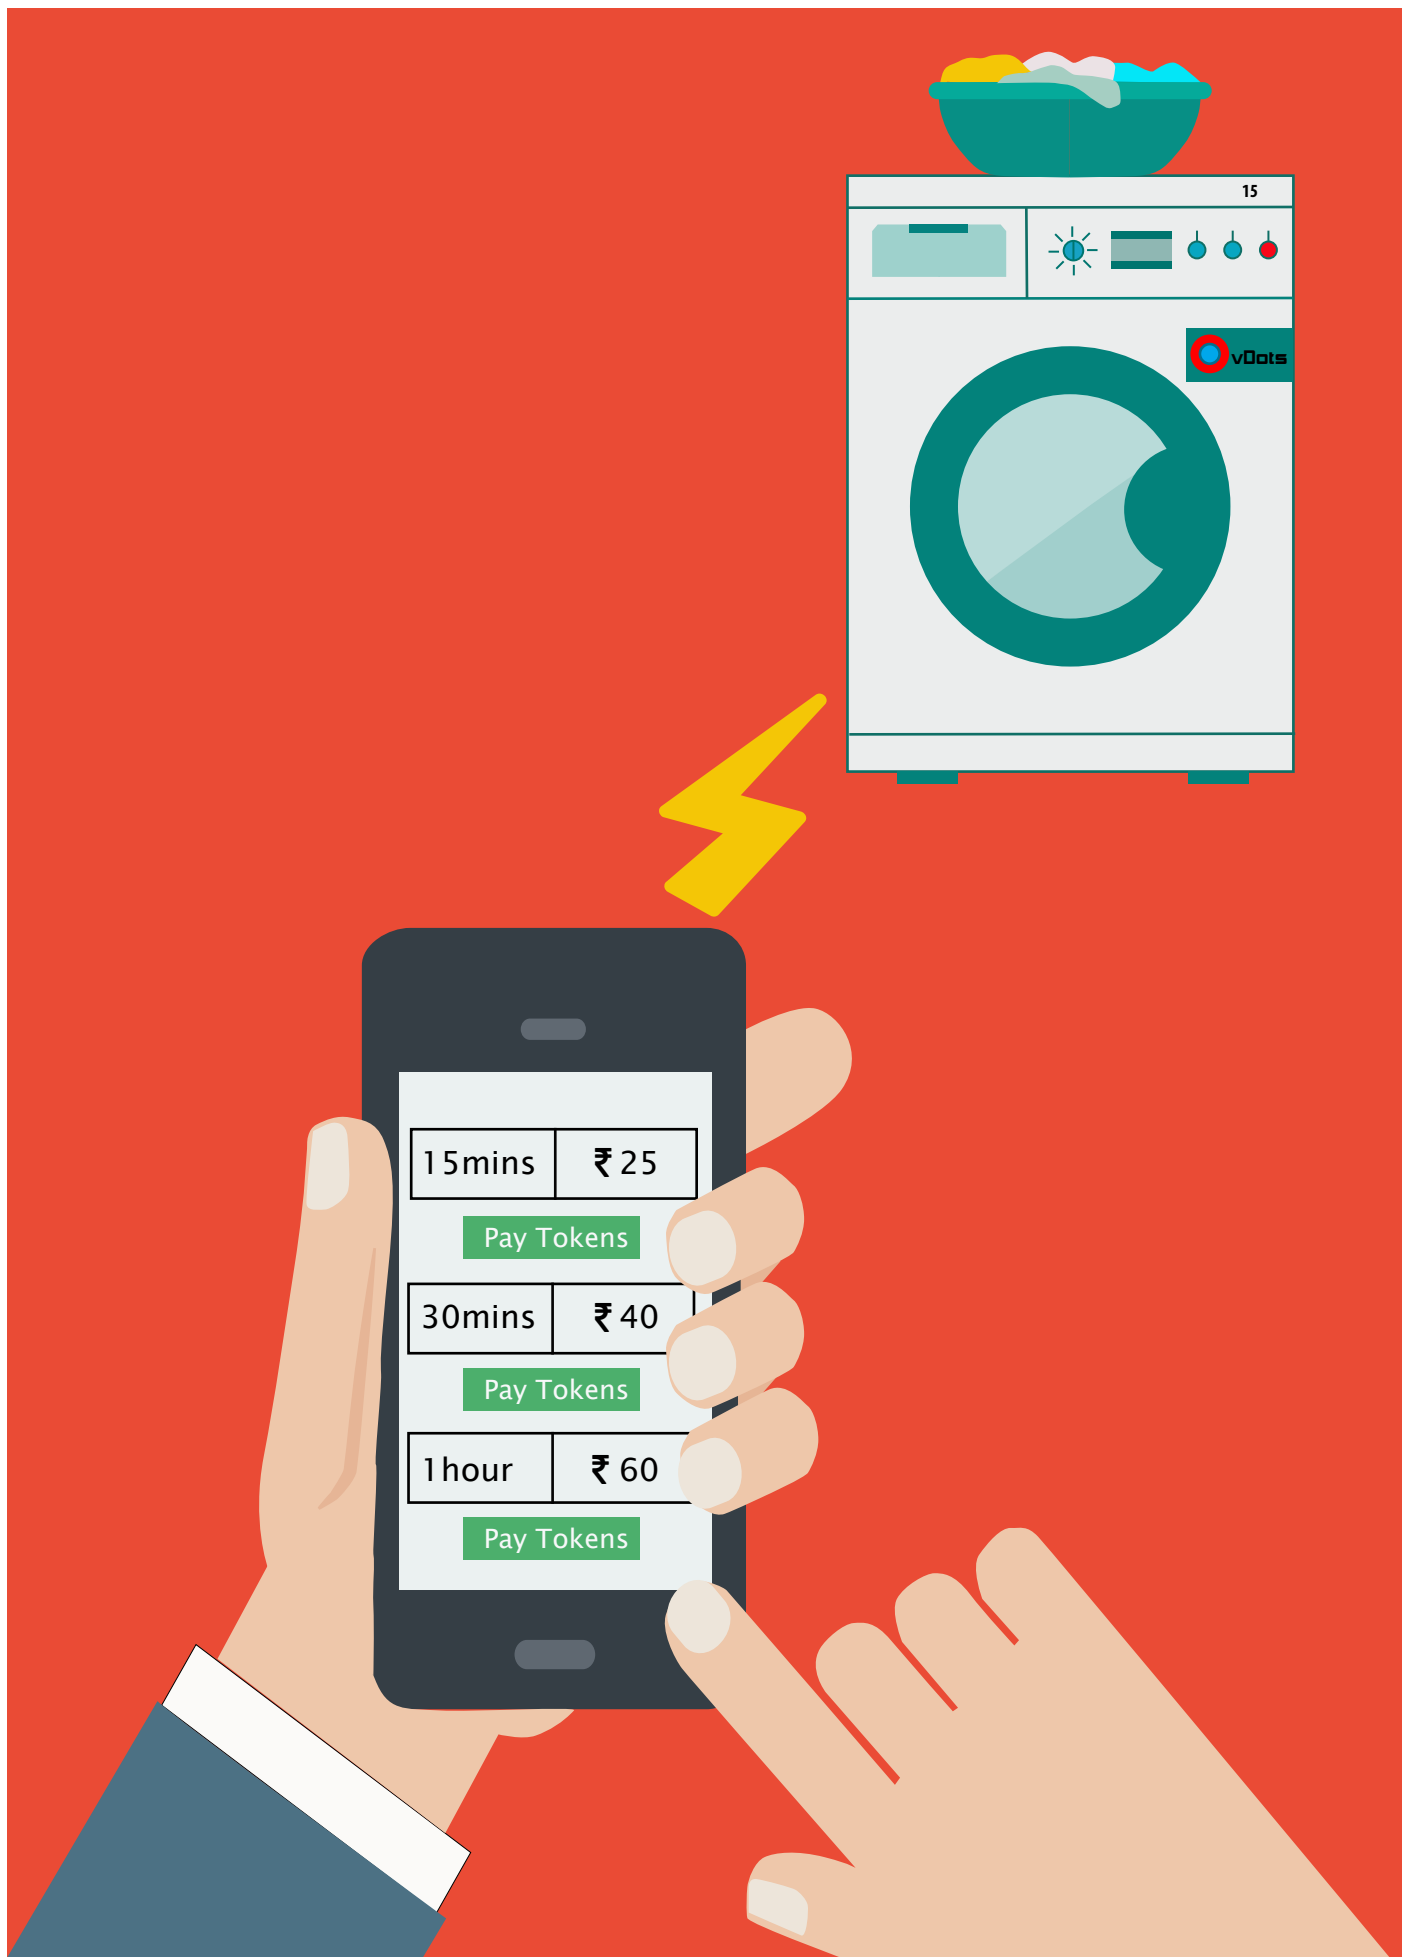

User receives the digital tokens against the payment.

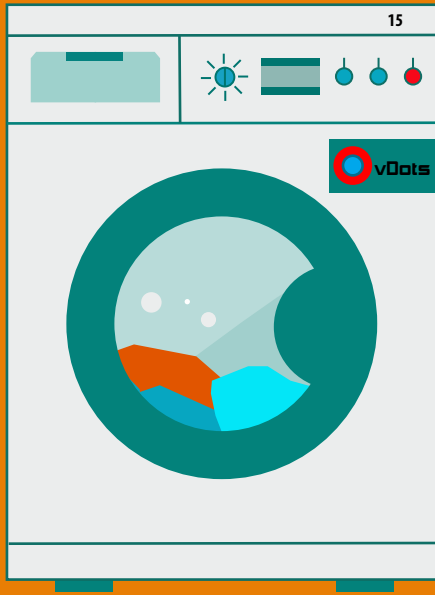

User visits a laundry shop, searches for an available washing machine. vDotPay inside not-in-use washing machine sends notification to the user

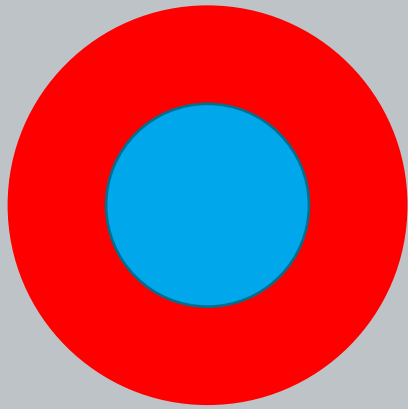

User selects “Pay Tokens” option and respective tokens get authenticated over the Bluetooth[®] with Washing Machine 15. No internet required.

User is happy!
No credit card, no debit card, no cash required.
vDotPay makes digital payment easy and
makes machine act as per user's choice.
